HOW TO USE THIS GUIDE

1. Briefly review entire guide for any items that need clarification. (5-10 Min.)
2. Write down all questions and preliminary answers the back of each sheet or separate paper.
3. Research each item thoroughly and pencil in answers on copy. **Always keep in mind your style, theme, colors, stains, woods and finishes.**
4. Complete entire spec. guide as best as you can. Attach notes or pictures as needed.

Note:

This guide is needed for clarification. All items must be answered in order to complete your home. The research will take you a long time, so start today. For a more accurate budget, the entire guide should be completed prior to bidding, but general answers can get the project started sooner. Budget may be affected by your choices, so the sooner you decide the better.
